Placement is at the discretion of the instructor; ages are a guideline. The first month of classes will determine if the student was placed in the correct level. Extra classes will be requested to assist the dancer to achieve their goal set. Instructors will help dancers set a realistic and reachable goals for their personal ability. Each body type will have different challenges. If your child is wishing to have a future in dance as a performer or teacher, an appointment needs to be made with the Artistic Director who will give the best advise to guide the direction of training.
